

*The ideal solution for securely mounting self-service kiosks.*

## BasePoint XK

The BasePoint XK from Source Technologies provides a secure floor-mount or base-mount stand for self-service kiosks. Ideal for retail, healthcare, hospitality and government organizations, this stand provides the ultimate mounting flexibility in an attractive and sturdy form factor.

The BasePoint XK can be secured directly to the floor for a robust installation. The optional stability base provides deployers the added flexibility of repositioning the kiosk stand when needed while securely supporting the kiosk. This is a great option when foot traffic patterns change due to seasonal sales events.

The stand also offers an optional thermal receipt printer securely integrated in the front door, enabling the self-service kiosk to be used as a POS device.
