

Ideal for integration into self-service kiosks, the ServPoint KSK offers the unique balance of power and flexibility necessary for today's self-service environments.

ServPoint™ KSK

The ServPoint KSK touchscreen computer is a robust, open-frame, self-service platform designed from the ground up for easy integration into self-service kiosk cabinetry. The ServPoint KSK features a 12.1 inch LCD display and a powerful Intel® processor, supporting a broad range of Windows®-based applications.

Features such as the vivid infrared touchscreen display and plenty of ports to support peripheral devices allow integrators to deploy the ServPoint KSK for a variety of uses. And its flexible plug-and-play device integration enables integrators to run applications developed using either the PilotPoint™ Software Platform or third-party tools.
